**Patrick Robinson : Nimitz Class** before purchasing it in order to gage whether or not it would be worth my time, and all praised Nimitz Class:

1 of 1 people found the following review helpful. Nimitz Class By Linda Sheean This story about a battleship which suddenly vanished by nuclear fission, leaving behind the other ships in its group, is rather scary and at the same time very convoluted and sudden. The US Navy attempts to solve the mystery, bringing the cause down to one man and the problem of what to do with this killer when he is finally caught because he is a very intelligent fellow, and heretofore involved with the Navy in a positive way. Admiral Morgan is the main character in the book along with the President and the Chairman of the Joint Chiefs, as they pursue this murderer through the oceans. It is a gripping book and at times funny because Admiral Morgan is a definitely unique and powerful force both in his ordinary life and as the main man to find the murderer. As a Democrat I do not agree with the Administration's point of view, but that is par for course, and makes the book a bit more spicy. I have read it three times. 0 of 0 people found the following review helpful. Great read. By Fred Altvater I read this with great interest as an ex-submarine sailor. I have long wondered why the Navy has not built diesel electric subs for their quiet and stealth in shallower waters. This is where our special forces may need to operate in this day and age. 0 of 0 people found the following review helpful. Nimitz Class By Jack M. Cook Exciting, suspense, and action a strong plot. Enjoyed it and looked to see how it turned out.

It's as big as the Empire State Building, a massive floating fortress at the throbbing heart of a US Navy carrier battle group. Its supersonic aircraft can level entire cities at a stroke. Its surveillance gear can track every target within thousands of square miles - in the air, on the surface, and under the sea. Its crew of 6,000 works night and day to keep this awesome military machine at peak performance. It's a Nimitz-class nuclear carrier, the most powerful weapons system on the planet. Nothing can touch it. So when the first stunned messages say only that the Thomas Jefferson has disappeared, the navy reacts with disbelief. But as her battered escorts report in, the truth becomes inescapable: a Nimitz-class carrier has been claimed by nuclear catastrophe - the mightiest military unit on earth, vaporized without warning by an accidental detonation of unimaginable power. No other explanation is possible. But as navy maverick Bill Baldrige begins to investigate the disaster that claimed his idolized brother's life, another chilling alternative begins to emerge from the high-tech web of fleeting sonar contacts and elusive radar blips. It points to a rogue submarine commanded by a world-class undersea warrior with the steely nerve and cunning of a master spy. Suddenly it's up to Bill Baldrige to track down this shadowy nuclear terrorist who has already turned America's ultimate weapon into the biggest sitting duck in history - and who still has another nuclear-tipped torpedo in his tubes. He's already proved he has the icy ruthlessness to incinerate 6,000 sailors without a qualm. What will he do for an encore?

In this audio the modern military springs to life, from the Pentagon's tense conferences to the screaming flight deck of a giant carrier to the silent conning tower of an attack sub on full alert. But as Bill Baldrige races against time to pursue the nation's most deadly enemy, we are forced to ask ourselves serious real-life questions: Have defense budget cuts jeopardized our national security? Are we prepared to defend ourselves against naval terrorists? How safe are we? Nimitz Class is a world-class technothriller with a plot as riveting as *The Hunt for Red October* - and an explosive twist out of tomorrow's headlines. Today it's a novel. Tomorrow it might be the news.
